

ENDURAGEN FOR TELECOM

Keep remote telecom sites powered longer

Extend tower runtime beyond short battery windows while reducing service calls.

6,000

HOURLY MAINTENANCE INTERVAL

40,000+

HOURLY ENGINE LIFE

NG / PROPANE

FLEXIBLE FUEL OPTIONS

Power for difficult-to-reach sites

EnduraGen provides long-life prime power for remote network infrastructure. It helps keep critical equipment running beyond the limited runtime of battery systems. The extended maintenance interval also reduces the need for frequent service trips, helping operators improve uptime, simplify site maintenance, and lower long-term operating costs.

Telecom applications

- Remote tower sites
- Edge computing locations
- Radio & communication shelters
- Network, telemetry & monitoring equipment

ENDURAGEN™

Longer runtime. Fewer site visits.
