

Reliable power for Rail & Transport

Power for critical trackside systems

EnduraGen provides continuous prime power or intermittent operation for unattended rail infrastructure where access is difficult, utility service is limited, and equipment uptime matters.

OPERATIONAL ADVANTAGES

- Fewer scheduled maintenance visits
- Weatherproof design for exposed sites
- Natural gas or propane operation
- Lower service burden across the network
- 6,000 hours between service
- 40,000+ hour engine life

WHERE ENDURAGEN FITS

SIGNALS & SWITCHING

Signal bungalows, interlockings and powered switch equipment

CROSSING & COMMUNICATIONS

Grade crossings, radio sites and network equipment

WAYSIDE MONITORING

Defect detectors, sensors, telemetry and surveillance

REMOTE RAIL FACILITIES

Maintenance sites, yards and isolated operating assets

**Fewer field visits. Longer life.
More reliable rail operations.**
