

# Benefits of Axiom Energy microCHP vs. large scale CHP

## Smaller Footprint

- can easily fit in smaller spaces/utility rooms

## Scalable

- can put in multiple systems and scale as necessary

## Modulates

- unique engine and system design allows the mCHP to speed up or slow down as needed to keep running as long as possible

## Lower Cost

- less expensive – quicker ROI

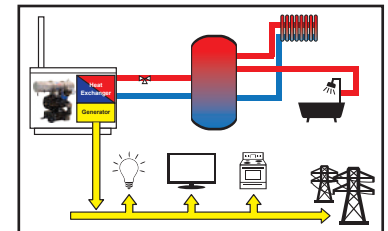

## Versatile

- fits in smaller applications (lower thermal loads)

## Sizing

- great for water heating; easy to size for as doesn't fluctuate like space heating

## Low Emissions

- one system reduces CO<sub>2</sub> emissions by 65%, SO<sub>2</sub> by 99.99%, NO<sub>x</sub> by 98.4% when compared to buying electricity from the grid
